

Cats

The cat (*Felis catus*) is a domestic species of small carnivorous mammal. It is the only domesticated species in the family Felidae and is often referred to as the domestic cat to distinguish it from the wild members of the family.

Dogs

The dog or domestic dog (*Canis familiaris* or *Canis lupus familiaris*) is a domesticated descendent of the wolf.

The dog is derived from an ancient, extinct wolf is the dog's living relative.

Foxes

Foxes are small to medium-sized, omnivorous mammals belonging to several genera of the family Canidae. They have a flattened skull, upright triangular ears, a pointed, slightly upturned snout, and a long bushy tail (or brush).

Snakes

Snakes are elongated, limbless, carnivorous reptiles of the suborder Serpentes.

Like all snakes are ectothermic, amniote vertebrates covered in overlapping scales.
